

## **GENDER PAY GAP REPORT 2022/23**

Our gender pay gap as at 5 April 2023 is below:

Our mean gender pay gap is 14% in favour of men. This is the difference between men's average hourly pay and women's average hourly pay by combining all salaries within the Company.

Our median gender pay gap is nil. This is the difference between the middle hourly pay of all men and the middle hourly pay of all women.

We don't have any mean and median bonus gender pay gap calculations, as this is not applicable to us.

Men and women's salaries were listed from highest to lowest and divided into four equal parts for higher and lower salaries. Our proportion of men and women in each pay quartile is:

	% of males	% of females
Lower quartile	31	69
Lower middle quartile	59	41
Upper middle quartile	24	76
Upper quartile	43	57

This shows that there are more women in our lower quartile (Cleaners, Catering Assistants, Box Office, Receptionists). However, Lower Middle Quartile is split more closely, with Upper Middle Quartile showing a split in favour of women. The Upper Quartile is also split more closely.

We consider the figures to be very positive when compared against other organisations and the UK average. Our men and women's salaries are spread equitably over all salary levels.

We are committed to equal pay for all team members and we use a job evaluation system to determine pay grades for most job roles to ensure a fair structure.
